“ For two years I would drive by Bobs house as I drove to Branson Mo. As a former soldier and patriot I often wondered what type of hero lived here

One day I stopped and was greeted by a kind generous man who obviously would voice his opinions in many ways. Signs all over his yard, Bob and I began to talk about politics, military, his family, my family, electronics. Lol. Did I say Bob knew everything about everything. He was so concerned about his neighbors and helped many in need. Others, he would simply put in their place where they needed to be

WWII Vet, master minded the art of electronics and built a helicopter pad behind his house for emergencies

I will miss Bob. I will always hear his voice and how he called me son. In my heart he was my other dad

So much more to say about Bob. I'm sure many of his friends gained so much knowledge and wisdom from Bob

My name is also Bob, we had lots in common

I love you man❤️

Bob Gipson - October 12, 2021 at 10:36 PM

Knew him personally, lived up the road briefly with family. Spent many hours talking and getting to know him.
